

Şehriban Yiğit

GEOMATICS ENGINEER | GEOSPATIAL DATA AND GEOAI

Türkiye • sehibanygt65@gmail.com • github.com/sehibanyigit

LinkedIn: Şehriban Yiğit

PROFILE

Geomatics engineer with research experience and independent projects in spatial analysis, Earth observation, GeoAI and web mapping. Builds reproducible workflows and communicates findings with clear maps, metrics and careful interpretation.

CORE SKILLS

Spatial analysis and GIS: Python, GeoPandas, SQL, PostGIS, DuckDB, GDAL, QGIS, ArcGIS, Netcad

Earth observation: Landsat, Sentinel-2, raster analysis, NDVI, land surface temperature

GeoAI: PyTorch, Mask R-CNN, instance segmentation, model evaluation

Web mapping and workflows: MapLibre GL JS, PMTiles, Bash, Docker, GitHub Pages

Cloud-hosted spatial data: Overture Maps

SELECTED GEOSPATIAL PROJECTS

Field Instance Segmentation in Spain | *Independent project, 2026*

- Trained a compute-conscious Mask R-CNN baseline on Sentinel-2 RGB and NIR imagery; evaluated 216 held-out tiles (mean IoU 0.4938; F1/Dice 0.6551).
- Examined field morphology across 197 valid test tiles; median field area and IoU had a Spearman association of +0.478. github.com/sehibanyigit/ftw-field-segmentation

Adelaide Park Lands Cooling | *Independent project, 2026*

- Analysed Landsat land surface temperature and vegetation across 5,867 100 m grid cells; tested variation with distance from the Park Lands.
- Reported spatial heterogeneity without asserting a uniform cooling reach. github.com/sehibanyigit/adelaide-parklands-cooling

Melbourne Essential Services Accessibility | *Independent project, 2026*

- Built a reproducible spatial workflow combining grocery, healthcare, park and transit data into SA2-level accessibility indicators and an interactive map.
- Published the analysis and web map at github.com/sehibanyigit/melbourne-essential-services-accessibility

Additional technical projects: NOAA Storm Events CLI pipeline; NYC hydrant PostGIS analysis and MapLibre web map. Repositories: github.com/sehibanyigit

PROFESSIONAL DEVELOPMENT

Independent geospatial learning and portfolio development | *October 2025 – September 2026*

- Completed focused training in modern GIS, data science, machine learning and deep learning while building published, reproducible geospatial projects.
- Studied GeoAI with Python through Qiusheng Wu's book and online lessons; applied deep learning to field instance segmentation.

PROFESSIONAL EXPERIENCE

E-commerce Manager | Kadınmodası.com | *September 2018 – March 2021, Türkiye*

- Seasonal role managing e-commerce operations and customer communication in a women's clothing business.

GIS Specialist and Personnel Supervisor | GPS Tek Engineering | *May – September 2017, Türkiye*

- Seasonal role supporting the Spatial Address Registration System rollout and coordinating project personnel in Kastamonu.

GIS Engineering Intern | Van Metropolitan Municipality | *July – August 2014, Türkiye*

EDUCATION AND RESEARCH

Doctoral studies in Geomatics | Istanbul Technical University | 2023–2025

Erasmus+ doctoral research mobility | University of Debrecen | 2024–2025

MSc in Geomatics Engineering | Istanbul Technical University | 2022

BSc in Geomatics Engineering | Selçuk University | 2016

Peer-reviewed publication: Renewable energy potential across Antarctic research stations and a preliminary study for the Turkish Research Base. Engineering Sciences, 2023. doi.org/10.28948/ngumuh.1208140

SELECTED TRAINING AND CERTIFICATIONS

Modern GIS Accelerator | Matt Forrest | Certificate of Completion, September 2026

Data Science and Machine Learning: 100-Day Bootcamp | Atıl Samancıoğlu, Udemy | 2026

Deep Learning: 100-Day Bootcamp | Atıl Samancıoğlu, Udemy | 2026

ArcGIS for Desktop Entry Certificate | Esri | 2016

GeoAI with Python | Qiusheng Wu | Self-directed book and online study

LANGUAGES

Turkish: native • English: intermediate, actively improving • Spanish: basic, currently learning
